ISBN 978-3-7258-0809-0 (Hardback)

ISBN 978-3-7258-0810-6 (PDF)

The purpose of this reprint is to present current research on the use of plant tissue cultures to produce specialized metabolites or secondary metabolites in plants. Numerous review articles on the use of instrument engineering, data modeling, and metabolic regulation in the synthesis of industrially significant plant secondary metabolites are included in this Special Issue. Research has covered contemporary methodologies like elicitation and the use of different bioreactors for biomass and metabolite syntheses. The research article addresses the production of specific metabolites employing cells, adventitious roots, and shoot cultures. Experts in the field provide their perspectives on research findings and future directions in this reprint. For those working in the fields of plant biotechnology, food, pharmaceuticals, and nutraceutical science, as well as for those working in academics, industry, and policymaking and students, the review and research papers will be helpful.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
