The water environment serves as the foundation for numerous habitats and ecosystems. The discharge and accumulation of pollutants can disrupt the balance of aquatic ecosystems, leading to species extinction, ecological disruptions, and direct or indirect impacts on human health. Against the backdrop of the global carbon peak and carbon neutrality, controlling water pollution has become increasingly important. Within the broad framework of "water environment pollution and control," this Special Issue aims to provide essential knowledge and establish a solid scientific foundation for the control and management of water pollution by studying the environmental behavior and bioavailability of various pollutants. It can serve as a scientific basis for developing effective pollution prevention and control strategies, and can provide guidance for establishing a clean, healthy, and sustainable environment. We believe the reprint of "Water Environment Pollution and Control" will offer readers comprehensive and in depth knowledge, thereby promoting further research in the field of water environment pollution and control.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
