The subjects of building physics, and structural and safety engineering have always been popular research topics globally for scientists across many fields, including, but not limited to, architecture, civil engineering, and safety engineering. In recent years, considerable scientific progress has been achieved regarding the related research themes. This Special Issue is dedicated to recent advances in the design, theoretical, numerical, and experimental study of building physics, structural, and safety engineering, including building systems and materials; energy and environment; green building and architecture; structural engineering; disaster prevention and mitigation projects; smart materials and structures; constructions and composites; structural health monitoring; civil engineering; and architecture. For this event, all these topics were covered in the extensive submissions accepted, but interesting papers on other aspects of building structure were also received. In this reprint, the main research findings of the accepted papers in this Special Issue, including fired control, building insulation, wind comfort, hygrothermal performance, in situ structural evaluation, concrete production, piled raft foundations performance evaluation, wall piers, and pipe heat transfer, are summarized, and a number of research questions and directions are identified.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

## Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

## Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

## High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

## High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

## Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
