ISBN 978-3-7258-1499-2 (PDF)

Clinical signs of gastrointestinal disease are amongst the most common presenting complaints in small animal veterinary practice. Over the last decade, many scientific advances have been made regarding determining the etiopathogenesis, improving diagnostics, and optimizing the treatment of various gastrointestinal diseases in dogs and cats. Despite this, there are still large knowledge gaps in our understanding of the underlying pathogenesis and, therefore, the development of non-invasive diagnostic methods or efficacious treatments for common gastrointestinal diseases, such as chronic inflammatory enteropathy, canine protein-losing enteropathy, and feline enteric-associated T-cell lymphoma-2. Therefore, the publication of new scientific findings focused on canine and feline gastroenterology will help to advance our understanding, diagnosis, and treatment of various gastrointestinal diseases. The aim of the present Special Issue was to gather, in one publication, the most recent advances in canine and feline gastrointestinal research.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
