Alfredo Caturano

ISBN 978-3-7258-1667-5 (Hardback)
ISBN 978-3-7258-1668-2 (PDF)

Cardiovascular diseases (CVDs) continue to be the leading cause of mortality worldwide, with an estimated 17.9 million deaths in 2019, representing 32% of all global deaths. Heart attacks and strokes accounted for approximately 85% of these fatalities. The prevalence of CVDs is worsened by metabolic diseases, particularly diabetes, which affects about 422 million people globally, primarily in low- and middle-income countries, and causes 1.5 million deaths annually. Early detection and intervention of CVDs and metabolic diseases are crucial, as many cases can be prevented by addressing modifiable behavioral risk factors such as tobacco use, unhealthy diet, obesity, physical inactivity, and harmful alcohol consumption. Significant advancements in treatment, from pharmacological developments to both invasive and non-invasive techniques, are continuously being made. Given the complexity and clinical significance of this topic, Biomedicines is proud to present a Special Issue titled "Cardiovascular and Metabolic Disease: New Treatments and Future Directions 2.0". This issue aims to compile contemporary scientific information on emerging treatments for CVDs and metabolic diseases. They provide valuable insights to the field and enhance our understanding of these interconnected health challenges.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
