ISBN 978-3-7258-1775-7 (Hardback)
ISBN 978-3-7258-1776-4 (PDF)

This special issue focuses on the effective recovery and utilization of bioactive compounds from fruit and vegetable wastes, not only to reduce the environmental footprint, but also to add economic value to agro-industrial wastes. This approach is also in line with global sustainability goals aimed at reducing food waste and improving the overall health profile of food products. Fruit and vegetable waste is a critical problem worldwide that can come from wasting inedible parts or even from poor food handling or preservation. Fruit and vegetable by-products are rich in bioactive compounds and can be used as novel ingredients or food fortificants. An optimal extraction of these health-promoting compounds will allow efficient use of these compounds, just as we can reduce the amount of fruit and vegetable waste. Moreover, these by-products can have numerous potential applications in different fields, favouring a circular economy. In this way, we can develop more sustainable agricultural systems and improve food security and nutrition. As a result, this special issue is a contribution to eco-sustainable practices in the agri-food industry and innovation in by-product utilization. The ability to transform waste into valuable supplements and ingredients is an important step forward in our quest for a more resource-efficient and sustainable world.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
