This Special Issue, “*Advances in Structural Analysis and Rehabilitation for Existing Structures*”, presents a curated collection of cutting-edge research and innovative methodologies focused on the assessment and rehabilitation of aging infrastructure. As structures worldwide face the challenges of time, environmental stressors, and evolving safety standards, this compilation offers essential insights into extending the lifespan and improving the performance of existing buildings, bridges, and other critical infrastructure. Covering a wide range of topics—from advanced structural analysis techniques to novel materials and retrofitting strategies—this issue is an invaluable resource for civil and structural engineers, researchers, and professionals in the field of construction and infrastructure management. By bridging the gap between theoretical research and practical applications, the contributions within this issue provide actionable knowledge that can be directly applied to real-world challenges.

Whether you are involved in the design, maintenance, or rehabilitation of structures, this Special Issue serves as a comprehensive guide to the latest advancements, helping you stay at the forefront of developments in structural engineering and ensuring the resilience and sustainability of our built environment.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

## Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

## Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

## High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

## High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

## Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
