With the continuous development of social civilization and the gradual improvement in the level of road engineering construction, there are more urgent requirements for road service functions, including green construction and safety guarantees. Asphalt is the world's most commonly used material in the construction of pavement engineering and coatings. Since entering the 21st century, the emergence of new functional materials and the development of the interdisciplinary concept have provided strong support for the design and construction of all kinds of green asphalt materials. In recent decades, the composition and property of asphalt paving materials have dramatically changed and, consequently, the development of green, sustainable, and functional materials is a new challenge that researchers are facing globally in order to tackle the aforementioned needs. At the same time, it is also the foremost direction for advancement in the development of road engineering discipline. As a result, scholars around the world have carried out a lot of in-depth research on novel green asphalt materials and applied technologies, and a number of important innovative results have been achieved. This Special Issue shall highlight the latest trends in novel green asphalt materials of special function. The studies included in this Special Issue will help guide the development direction of functional asphalt materials.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

## Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

## Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

## High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

## High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

## Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
