ISBN 978-3-7258-1712-2 (PDF)

Paediatric Dermatology is an expanding subspeciality. This is well illustrated by the growing number of books and articles published on this subject in these recent years. On the other hand, Paediatric Dermatopathology is a relatively recent and less explored niche. There are many skin conditions common in both adults and children. However, some skin disorders are mostly observed in childhood and some entities are restricted to a paediatric age. Paediatric Dermatopathology covers a wide range of disorders including genodermatoses, cutaneous and sub-cutaneous tumours and inflammatory disorders. Nowadays, Paediatricians and Paediatric Dermatologists are no longer reluctant to routinely perform a cutaneous biopsy in a young child, even for a vascular lesion. As a result, Dermatopathologists are more and more called upon to deal with skin biopsies in neonates, infants and children. This Special Issue covers a subset of paediatric dermatological conditions in which a great deal of knowledge has been achieved in recent times, thanks to development of new immunomarkers, application of molecular biology and introduction of new classification system(s). This issue is addressed to Dermatologists and Pathologists interested in Paediatric Dermatopathology.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
