The aim of this Special Issue is to illustrate the state of the art of advanced manufacturing processes, giving a unique relevance to recent developments achieved in this field, which may provide innovative engineering solutions to the industry. It encompasses 11 original research papers, each addressing different areas of manufacturing technology. Specifically, four papers address material welding and joining, five papers are focused on subtractive manufacturing (machining/cutting processes), one paper addresses material forming, and one paper focuses on dimensional control in assembly. Different research topics and different methodological approaches have been studied or followed among the works published in this Special Issue, highlighting its multidisciplinary nature. The publications in this Special Issue come from various research groups spread widely across the world. The level of expertise among the researchers who have contributed to this Special Issue is outstanding, constituting the excellence of this compilation of scientific articles for the manufacturing sector.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

### **Open Access**

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

### **Author Focus**

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

### **High Quality & Rapid Publication**

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

### **High Visibility**

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

### **Print on Demand and Multiple Formats**

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
