The concurrent nature of severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) means that a wider approach is needed to protect the health of our communities. The Special Issue “COVID-19 Prevention and Treatment”, arising from the need for a new approach both in the clinical setting and in therapeutic regimens, collected 22 papers, sharing results to enlighten some aspects of the difficult story of COVID-19. Original research articles, reviews, and short reports on various aspects of COVID-19 have been collected, leading to an interdisciplinary consensus in a new perspective. The Special Issue has been viewed 75062 times (September 2024).
