ISBN 978-3-7258-1610-1 (PDF)

The world we live in is rapidly changing, and these changes have huge negative environmental, social and economic impacts. In response to the challenges of our time (climate change, environmental degradation and socio-economic crisis), numerous documents have been approved to support and incentivize measures to make our country more sustainable. In this context, assessment tools, spatial planning, governance strategies, and business and financial models play a key role. The current approaches to assessments are mostly sectoral and focus on individual dimensions (economic, social, environmental) rather than on their inter-relationships. Considering the multiplicity of values and actors involved in the processes of conservation and regeneration of cultural heritage, landscape and urban and peri-urban areas, the impacts of these changes require appropriate assessment tools that embrace multiple dimensions. This Special Issue investigates the approaches and tools of spatial planning and urban regeneration used to achieve sustainable development objectives, whilst also considering the current challenges that are changing the common views on them.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
