Principles of Neurosurgery: A Concise Text

**Edited by: Forhad H. Chowdhury, Mainul Haque Sarker,
Mohammad Raziul Haque, Khandkar Ali Kawsar
and Jalal Uddin Mohammad Rumi**

Neurosurgery is a vast subspecialty in medical sciences, and brief textbooks covering all aspects of neurosurgery are rare, especially for postgraduate students, undergraduate students, and general physicians. The available neurosurgery textbooks are either very detailed or do not cover all aspects of neurosurgery. This book will provide significant aid to those sitting for a neurosurgery postgraduate examination/board examination or those looking for concise information about neurosurgery. This book is based on recent and established scientific data and will address all aspects of neurosurgery in order to guide both practicing neurosurgeons and neuroscientists. In this book, greater emphasis will be placed on common neurosurgical conditions, without ignoring less frequent conditions.
