Transitioning to Strong Partnerships for the Sustainable Development Goals is an edited volume dedicated to current developments in SDG 17 “Partnerships for the Goals”. This goal contains preconditions and systemic issues that will facilitate the success of the SDGs in general. Thus, the volume covers conditions, structures, and means to strengthen the SDGs from both the theoretical and practical perspective. Transitioning to Strong Partnerships for the Sustainable Development Goals has three main focal points:

1. Theoretical approaches to sustainable partnerships, including public–private partnerships.
2. Different structural aspects for sustainable partnerships, including financial deals with philanthropic initiatives and new financing models as well as new technologies to meet the logistical challenges of development aid.
3. Systemic issues, especially institutional coherence, multi-stakeholder approaches, and challenges of statistics for development.

We invite academic and practical contributions to these issues and aim for broad coverage of different fields of research and expertise.

Transitioning to Strong Partnerships for the Sustainable Development Goals is part of MDPI's new Open Access book series Transitioning to Sustainability. With this series, MDPI pursues environmentally and socially relevant research that contributes to efforts toward a sustainable world. Transitioning to Sustainability aims to add to the conversation about regional and global sustainable development according to the 17 SDGs.
