ISBN 978-3-7258-3603-1 (Hardback)

ISBN 978-3-7258-3604-8 (PDF)

The following reprint focuses on advanced research topics related to human lactation, from breastfeeding preterm infants in the NICU, improving access to perinatal services for new fathers, the breastfeeding experiences of mothers of multiple birth infants, the human milk microbiome and its role in infant allergies, and breastfeeding infants with type 1 diabetes to initiatives aimed at improving breastfeeding outcomes among urban Western Australian Aboriginal communities through continuous quality improvement efforts. The ABREAST Network remains dedicated to fostering inclusivity, diversity, passion, and innovation in lactation research. This commitment is evident not only in the range of research topics presented but also in the network's continued drive to make a meaningful difference in the lives of mothers, infants, and communities worldwide. The ABREAST Conference creates a platform for collaboration, bringing together researchers, clinicians, students, and community stakeholders to exchange knowledge and insights in a dynamic and engaging environment.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

## Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

## Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

## High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

## High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

## Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
