Text Correction

There was an error in the original publication [1]. The sequencing read length was incorrectly stated to be 2×150 bp instead of the correct 2×250 bp.

A correction has been made to Section 2.3. DNA Extraction, Amplification and Sequencing, Paragraph 1.

Corrected Paragraph:

“Sequencing was conducted on an Illumina MiSeq platform (2×250 bp, Illumina, San Diego, CA, USA) following standard protocols.”

There was an error in the original publication [1]. The reference [28] was incorrectly written as Mansor, Halim, Abdullah and Ramli [28]. It was thus incorrectly written with all author surnames instead of et al.

A correction has been made to Section 2.4. Bioinformatics and Data Analysis, Paragraph 2.

Corrected Paragraph:

“Sequences showing a minimum 98% similarity were classified at the species level, those with 95% similarity at the genus level, and sequences with 90% similarity at the family level, following the methods of Mansor et al. [28].”

The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.
