

Supplementary Table S1

In table are reported: (a) the number of observations collected for each participant, in total and considering groups with 2, 3 or 4 patients supervised by one physiotherapist separately (R2, R3 and R4, respectively); (b) the number of observations with device-related measures collected for each participant (feasibility measures).

The total rehabilitation sessions can be obtained by dividing the number of observations in each group by the number of participants in each group (2, 3 and 4 for R2, R3 and R4 respectively).

Participant ID	Sex	Age	Observations (N)	Observations in R2 group (N)	Observations in R3 group (N)	Observations in R4 group (N)	Feasibility measures (N)
