

Supplementary Files

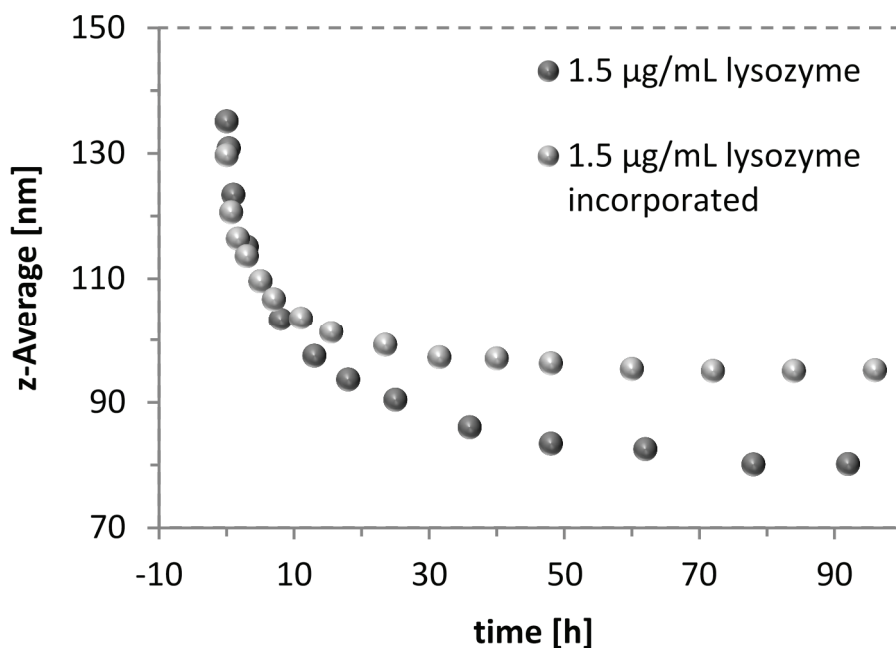

Figure S1. Plot of the particle size over the time during the degradation with 1.5 µg/mL lysozyme (“incorporated” and “free”) at 37 °C for chitosan-tripolyphosphate (3:1, 1 mg/mL, 0.075% AcOH, DA 42%) nanoparticle solutions.

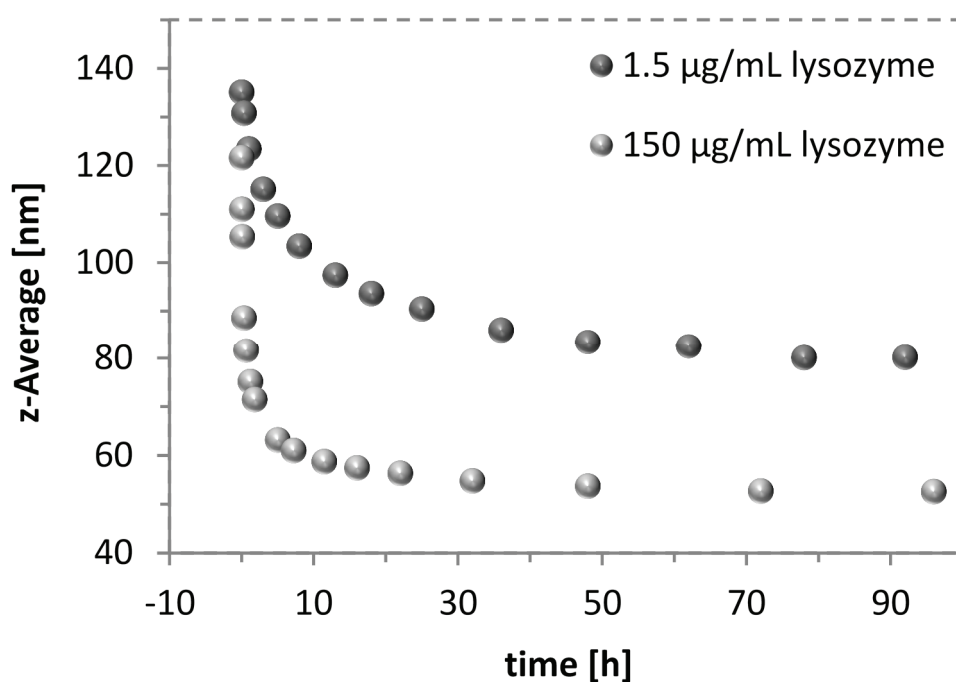

Figure S2. Plot of the particle size over the time during the degradation with 1.5 µg/mL or 150 µg/mL lysozyme at 37 °C for chitosan-tripolyphosphate (3:1, 1 mg/mL, 0.075% AcOH, DA 42%) nanoparticle solutions.
