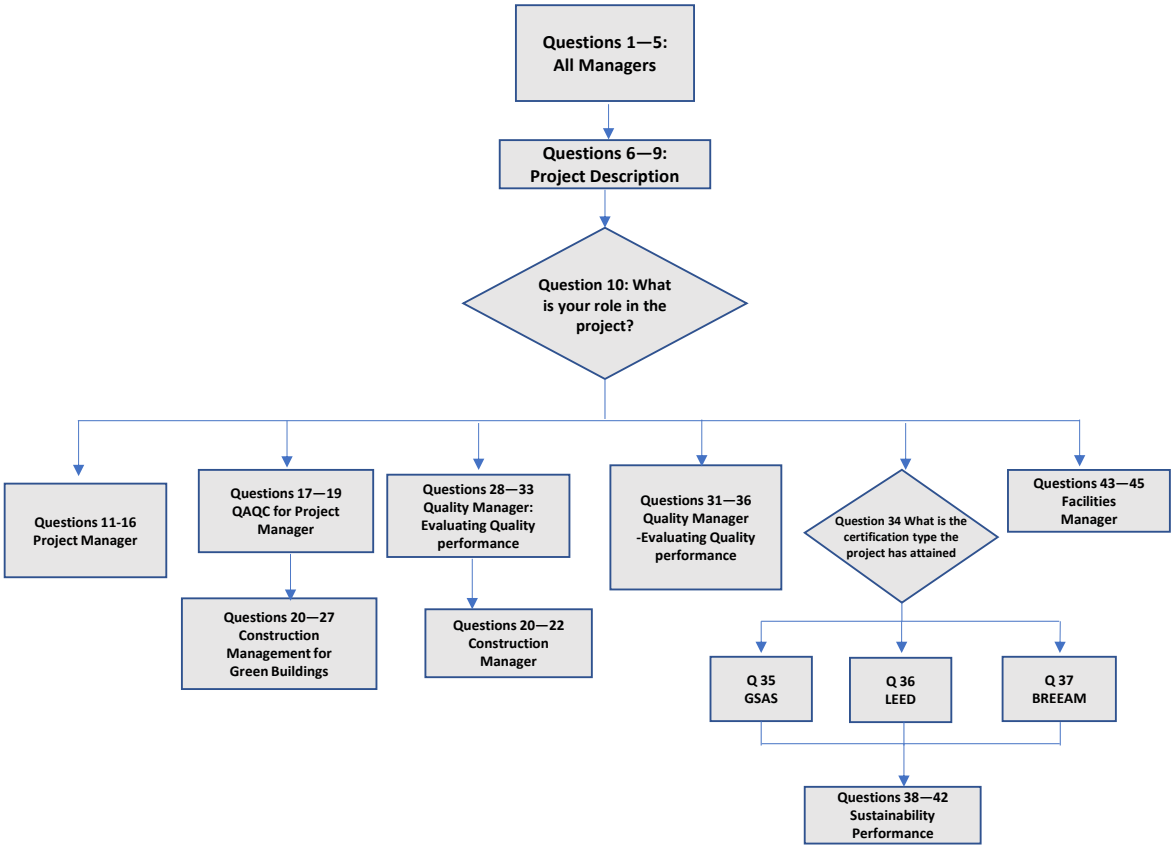
Supporting Information for the Article:

Managerial Practitioners' Perspectives on Quality Performance of Green-Building Projects

Ayman M. Raouf, Sami G. Al-Ghamdi

Summary of Questionnaire Results in the Article

1. Questionnaire Structure



2. Participant Demographics

Years of experience in construction industry in general:

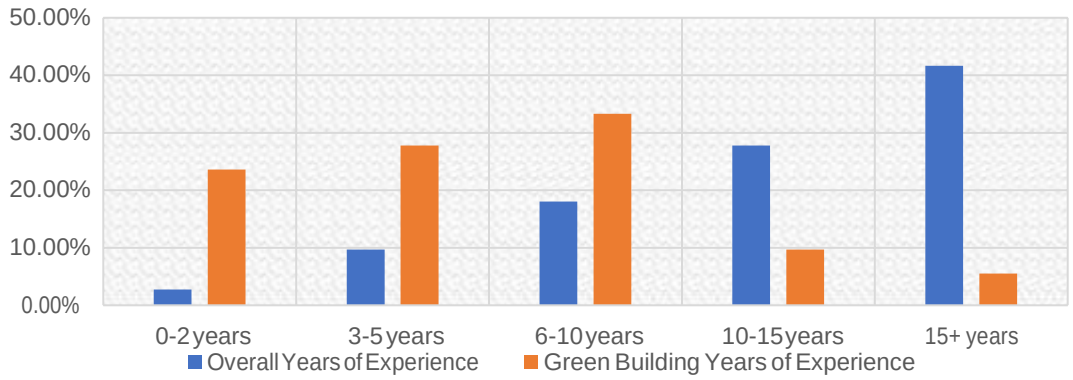
How many years of experience have you been involved in construction and/or operations?

Answer Choices	Responses	
0-2 years	2.35%	2
3-5 years	10.59%	9
6-10 years	20.00%	17
10-15 years	24.71%	21
15+ years	42.35%	36
	Answered	**85**
	Skipped	**11**

Years of experience in green buildings in particular

How long have you been involved with green buildings?

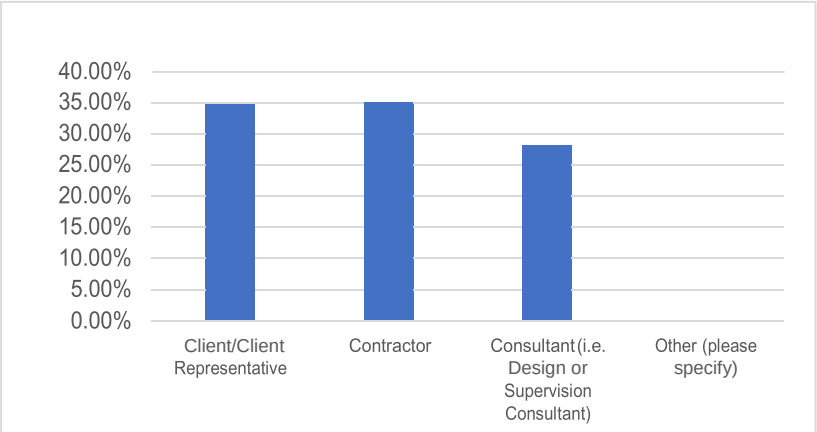
Answer Choices	Responses	
0-2 years	22.35%	19
3-5 years	32.94%	28
6-10 years	30.59%	26
10-15 years	9.41%	8
15+ years	4.71%	4
	Answered	**85**
	Skipped	**11**



3. Entity the respondent represents:

Which entity do you represent?

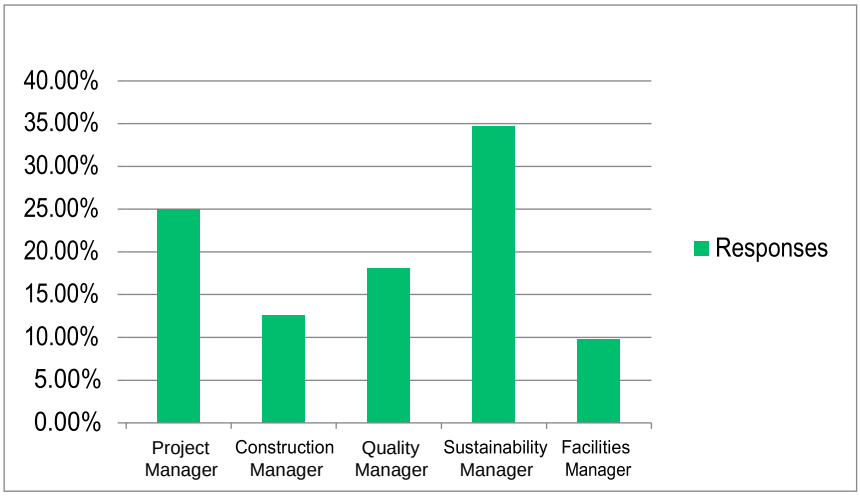
Answer Choices	Responses	
Client/Client Representative	29.76%	25
Contractor	32.14%	27
Consultant (i.e. Design or Supervision Consultant)	33.33%	28
Other (please specify)	4.76%	4
	Answered	**84**
	Skipped	**12**



Managerial Role In Project

What is your role in the project?

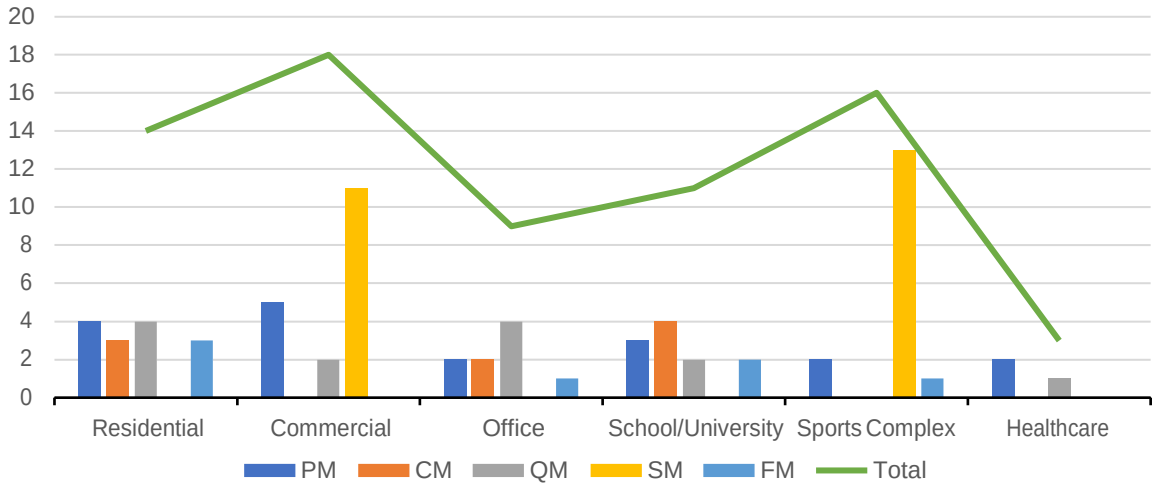
Answer Choices	Responses	
Project Manager	21.18%	18
Construction Manager	17.65%	15
Quality Manager	21.18%	18
Sustainability Manager	30.59%	26
Facilities Manager	9.41%	8
	Answered	**85**
	Skipped	**11**

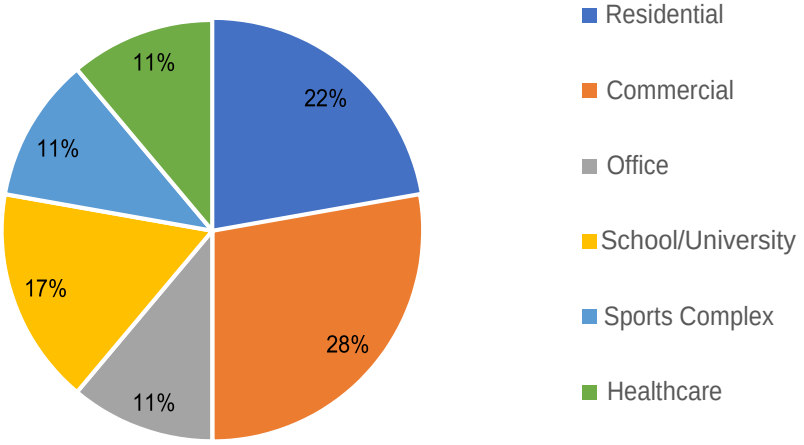


4. Projects Information

Project Type:

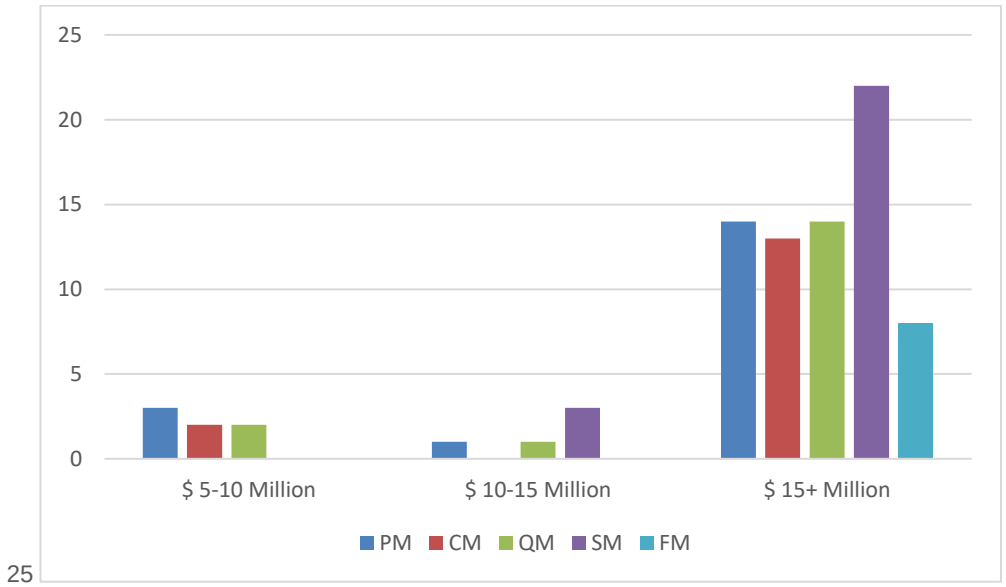
Project Type	PM	CM	QM	SM	FM	Total
Residential	4	3	4	0	3	14
Commercial	5	3	5	12	0	25
Office	2	4	5	0	1	12
School/University	3	4	2	0	2	11
Sports Complex	2	1	0	13	2	18
Healthcare	2	0	1	0	0	3





Project Size

Project Size in USD	PM	CM	QM	SM	FM
$ 5-10 Million	3	2	2	0	0
$ 10-15 Million	1	0	1	3	0
$ 15+ Million	14	13	14	22	8



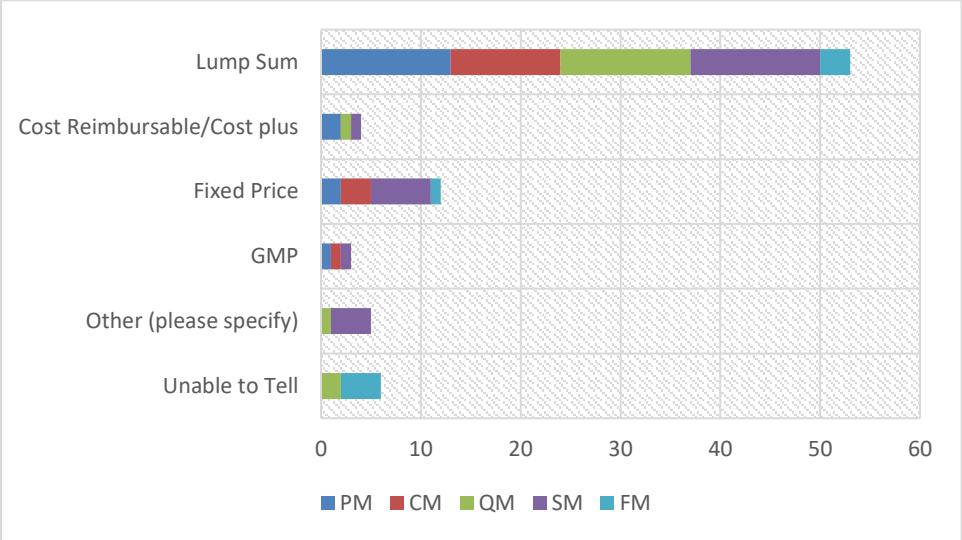
25

Delivery System Type

Delivery System	PM	CM	QM	SM	FM
Design Bid Build	5	4	5	3	1
Design and Build	12	8	10	19	5
Construction Management Agency/@Risk	1	3	1	0	0
Hybrid (please specify)	0	0	1	3	0
Unable to Tell	0	0	0	0	2
Total	**18**	**15**	**17**	25	**8**

Payment Mechanism

Payment Provision	PM	CM	QM	SM	FM
Unable to Tell	0	0	2	0	4
Other (please specify)	0	0	1	4	0
GMP	1	1	0	1	0
Fixed Price	2	3	0	6	1
Cost Reimbursable/Cost plus	2	0	1	1	0
Lump Sum	13	11	13	13	3



Green certification Types Pursued

Certification Type	PM	CM	QM*	SM	FM	Total
LEED	3	4	3	1	4	15
GSAS	5	5	11	14	3	38
BREEAM	0	0	0	0	0	0

*The QM results were collated based on the Collector of the online platform. Also important to note on occasions that the PM and QM worked on the same project so it was not feasible to separate the results on certification type for a project but rather on managerial type.

5. Quality Control and Assurance Awareness

Respondents' asked to respond correctly to the definitions of Quality Assurance and Quality Control:

Quality Assurance: "Owner/owner representative conducting planned, systematic actions to establish level of confidence that project design documents comply with applicable codes, standards and criteria, and that the resulting construction complies with the contract documents."

"Design or construction professional conducting plans, procedures, resources and organisation needed to monitor quality of the contract documents to ensure consistency with applicable codes, standards and criteria. This includes observations, inspections, tests and documentation that either confirm quality processes and systems are effective in ensuring achievement of quality."

Chi-Squared Test for QA QC Definitions

Actual			
Response	QA Correct Definition	QC Correct Definition	Total Number of Respondents
QM	10	10	20
CM	7	8	15
PM	7	7	14
Grand total	24	25	49

Expected			
Response	QA Correct Definition	QC Correct Defintion	Total number of respondents
QM	9.795918367	10.20408	*20*
CM	7.346938776	7.653061	*15*
PM	6.857142857	7.142857	*14*
Grand total	24	25	**49**

Ho is that there is no difference between managerial type and correct answer for Quality Control and Assurance

P to reject	0.05	less than 0.05 is strong evidence against null hypotheisis
P value:	0.977126762	Do not reject Null Hypothesis

Conclusion: no significant difference between the managers in the perception of the correct answer

6. Ranking of Quality Consequences

Rank 1: Greatest priority consequence that the manager influences

Rank 7: Lowest priority consequence that the manager influences

Managerial Type	Respondent Number	Liquidated Damages	Reputation Loss	Cost Overruns in Rectifying Mistakes	Schedule Delays	Material Loss	Labor Productivity Loss	Assigning Team to Work Overtime
QM	1	7	1	5	6	3	2	4
	2	7	5	2	4	6	1	3

Ref.: Approval for QBRI-IRB
Review Type: Expedited Review
IRB Approval Date: September 2, 2018
IRB Expiration Date: September 2, 2019
IRB Project Number: 2018-025
Project Title: Managerial Perspectives on Green Building Projects' Delivery Processes

Dear Prof. Sami Al-Gahmdi,

The QBRI Institutional Review Board (IRB) has reviewed your research proposal that was submitted for the above referenced protocol (2018-0025). **It has been determined that your research proposal is eligible for expedited status and requires no further review.** This falls under the category two in MOPH guidelines, regulations and policies for research involving human subjects stating *that research the use of educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures or observation of public behavior, unless: (i) information obtained is recorded in such a manner that human subjects can be identified; and (ii) any disclosure of the human subjects' responses outside the research could reasonably place the subjects at risk of criminal or civil liability or be damaging to the subjects' financial standing, employability, or reputation.*

Although your research proposal falls under the exempt status, the research must be conducted according to the submitted research protocol outlined in the approved proposal. Please note that any changes/modifications to the original submitted protocol should be reported to the IRB committee for guidance and review. **Please consider that any modifications to the referenced research proposal may subject the proposal from qualifying for exempt review and require submission of a new IRB application.**

Request for a renewal, if required, should be submitted to IRB at least one month prior to the expiry date to allow the IRB sufficient time to review and approve the request. It is the sole responsibility of the investigator to ensure the timely renewal of the IRB.

Wishing you all the success in conducting your research.

QATAR BIOMEDICAL RESEARCH INSTITUTE
APPROVAL DATE 02 SEP 2018
APPROVAL Expires 02 SEP 2019
IRB APPROVED

Sincerely,

Dr. Khalid Al-Ali

Mann-Whitney U test Liquidated Damages QM PM

Step 1: Counts

Group	n	
Quality Ma	11	=COUNTIF(A:A;G3)
Project Ma	11	
total	22	=SUM(M7:M8)

Step 2:

Group			
Quality Ma	66	=M7*(M7+1)/2	$\frac{n_i \times (n_i + 1)}{2}$
Project Ma	66		

Step 3: Determine ranks

Determine the rank for each respondent (use average rank)
C2: =RANK.AVG(B2;B:B;1)

Step 4: Determine average rank and sum of ranks per group

Group	Avg. Rank	Sum rank (R_i)	
Quality Ma	12.54545	138	=SUMIF(A:A;G3;C:C)
Project Ma	10.45455	115	

Step 5: Determine difference with Max rank (U)

Group	Difference		
Quality Ma	72	=N24-M14	$U_i = R_i - \frac{n_i \times (n_i + 1)}{2}$
Project Ma	49		

Step 6: Determine numerator for Z

Group	Denom.		
Quality Ma	11.5	=M30-$M$7*$M$8/2	$U_i - \frac{n_1 \times n_2}{2}$
Project Ma	-11.5		

Step 7: Determine the number of tied scores (t_i)

See column D
D2: =IF(COUNTIF($C$1:C1;C2)>0;"";COUNTIF(C:C;C2))

Step 8: Determine the adjustment for ties per tied rank

See column E
E2: =IF(D2="";"";(D2^3-D2)/12) $T_i = \frac{t_i^3 - t_i}{12}$

Step 9: Sum the results of step 8

Sum T_i 37.5 =SUM(E:E) $T = \sum T_i$

Step 10: Determine denominator (= SE)

denominator 14.90286 =SQRT(M7*M8/(M9*(M9-1))*((M9^3-M9)/12-M49))

$SE = \sqrt{\frac{n_1 \times n_2}{N(N-1)} \times \left(\frac{N^3 - N}{12} - \sum_i T_i\right)}$

Step 11: Determine Z

Z 0.771664 =M36/M53 $Z = \frac{U_i - \frac{n_1 \times n_2}{2}}{SE}$

Step 12: Determine significance

sig 0.(M.S.DIST(ABS(M57);TRUE))
0.034226 =2*(1-NORMSDIST(ABS(M57)))

sig 0.440313 =2*(1-NORM.S.DIST(ABS(M57);TRUE))
0.440313 =2*(1-NORMSDIST(ABS(M57)))

Mann-Whitney U test Schedule Delays QM PM

Step 1: Counts

Group	n	
Quality Ma	11	=COUNTIF(A:A;G3)
Project Ma	11	
total	22	=SUM(M7:M8)

Step 2:

Group		
Quality Ma	66	=M7*(M7+1)/2
Project Ma	66	

$$\frac{n_i \times (n_i+1)}{2}$$

Step 3: Determine ranks

Determine the rank for each respondent (use average rank)
C2: =RANK.AVG(B2;B:B;1)

Step 4: Determine average rank and sum of ranks per group

Group	Avg. Rank	Sum rank (R_i)	
Quality Ma	13.13636	144.5	=SUMIF(A:A;G3;C:C)
Project Ma	9.863636	108.5	

Step 5: Determine difference with Max rank (U)

Group	Difference	
Quality Ma	78.5	=N24-M14
Project Ma	42.5	

UDF 78.5

$$U_i = R_i - \frac{n_i \times (n_i+1)}{2}$$

Step 6: Determine numerator for Z

Group	Denom.	
Quality Ma	18	=M30-$M$7*$M$8/2
Project Ma	-18	

$$U_i - \frac{n_1 \times n_2}{2}$$

Step 7: Determine the number of tied scores (t_i)

See column D
D2: =IF(COUNTIF($C$1:C1;C2)>0;"";COUNTIF(C:C;C2))

Step 8: Determine the adjustment for ties per tied rank

See column E
E2: =IF(D2="";"";(D2^3-D2)/12)

$$T_i = \frac{t_i^3 - t_i}{12}$$

Step 9: Sum the results of step 8

Sum T_i 25.5 =SUM(E:E)

$$T = \sum T_i$$

Step 10: Determine denominator (= SE)

denominator 15.00793 =SQRT(M7*M8/(M9*(M9-1))*((M9^3-M9)/12-M49))

$$SE = \sqrt{\frac{n_1 \times n_2}{N(N-1)} \times \left(\frac{N^3 - N}{12} - \sum_i T_i\right)}$$

Step 11: Determine Z

UDF 1.199366

Z 1.199366 =M36/M53

$$Z = \frac{U_i - \frac{n_1 \times n_2}{2}}{SE}$$

UDF 0.034226

Step 12: Determine significance

sig 0.0[illegible] [illegible]M.S.DIST(ABS(M57);TRUE))
0.034226 =2*(1-NORMSDIST(ABS(M57)))

UDF 0.230386

Project Ma	66	=M7*(M7+1)/2
Constructi	105	

$$\frac{n_i \times (n_i+1)}{2}$$

Step 3: Determine ranks

Determine the rank for each respondent (use average rank)
C2: =RANK.AVG(B2;B:B;1)

Step 4: Determine average rank and sum of ranks per group

Group	Avg. Rank	Sum rank (R_i)	
Project Ma	14.68182	161.5	=SUMIF(A:A;G3;C:C)
Constructi	11.45455	126	

Step 5: Determine difference with Max rank (U)

Group	Difference	
Project Ma	95.5	=N24-M14
Constructi	21	

$$U_i = R_i - \frac{n_i \times (n_i+1)}{2}$$

Step 6: Determine numerator for Z

Group	Denom.	
Project Ma	18.5	=M30-$M$7*$M$8/2
Constructi	-56	

$$U_i - \frac{n_1 \times n_2}{2}$$

Step 7: Determine the number of tied scores (t_i)

See column D
D2: =IF(COUNTIF($C$1:C1;C2)>0;"";COUNTIF(C:C;C2))

Step 8: Determine the adjustment for ties per tied rank

See column E
E2: =IF(D2="";"";(D2^3-D2)/12)

$$T_i = \frac{t_i^3 - t_i}{12}$$

Step 9: Sum the results of step 8

Sum T_i 28 =SUM(E:E)

$$T = \sum T_i$$

Step 10: Determine denominator (= SE)

denominator 18.06876 =SQRT(M7*M8/(M9*(M9-1))*((M9^3-M9)/12-M49))

$$SE = \sqrt{\frac{n_1 \times n_2}{N(N-1)} \times \left(\frac{N^3 - N}{12} - \sum_i T_i\right)}$$

Step 11: Determine Z

Z 1.023867 =M36/M53

$$Z = \frac{U_i - \frac{n_1 \times n_2}{2}}{SE}$$

Step 12: Determine significance

sig 0.0 M.S.DIST(ABS(M57);TRUE))
0.034226 =2*(1-NORMSDIST(ABS(M57)))

sig 0.305898 =2*(1-NORM.S.DIST(ABS(M57);TRUE))
0.305898 =2*(1-NORMSDIST(ABS(M57)))

8. Complexity in Evaluating Quality Performance
Cronbach's Alpha Result:
Cronbach Alpha α= Total Number of Items/(Total Number of items – 1)*(1-Sum of Item Variances/Variance Total) Below is the Likert scale responses received by FM and QM.

Managerial Type	Item 1 Costs accounted with rectifying non-conformance through construction rework	Item 2 Costs accounted with rectifying non-conformance through design rework	Item 3 Total cost for QAQC personnel for a specific task (Activity-Based costing) -	Item 4 Inspection costs for Extra Low Voltage Systems (HVAC and Lighting Control)	Item 5 Revising Design Drawings to Achieve Code Compliance Before Construction Drawings	Item 6 Testing and Balancing of Water Systems	Item 7 Factory Tests for High Voltage Switchgears	Item 8 Repair of Green Building Technology Defects After Handover (e.g. HVAC/Greywater system/rainwater system)	Item 9 Indoor humidity and Mold Growth from Ventilation	Item 10 Installation errors from inexperienced sub- contractors	Item 11 Power surges affecting software glitches for building automation systems causing water systems' cistern malfunction	Item 12 6 Month Chemical and Bacterial Test of Drinking Water Systems	Item 13 Plumbing Defects: Water Hammer, Back-Siphonage
