Publisher's Note: Journal of Craniomaxillofacial Trauma and Reconstruction (CMTR)

Peter Roth

MDPI, St. Alban-Anlage 66, 4052 Basel, Switzerland; roth@mdpi.com

We are excited to welcome the *Journal of Craniomaxillofacial Trauma and Reconstruction* (CMTR) to the MDPI family. This new partnership represents a significant milestone in the journal's evolution, and we are committed to supporting CMTR's mission to advance research in craniomaxillofacial trauma and reconstruction through high-quality, accessible publications.

At MDPI, we understand that no two journals are the same. Each academic community has unique needs, goals, and challenges. That is why we believe flexibility is paramount in publishing. We take pride in our ability to adapt our workflows and services to the specific requirements of our partners. For CMTR, this means offering personalized support that aligns with AO CMF's global vision, while ensuring that the journal continues to serve its readership with excellence and precision.

This adaptability extends to our robust Open Access platform, which ensures that CMTR's cutting-edge research will be freely accessible to a global audience, reaching the clinicians, researchers, and patients who can benefit from it most. By providing this level of flexibility, MDPI empowers journals like CMTR to maximize their impact and contribute to advancing the field of craniomaxillofacial surgery.

We are excited about the future of CMTR under this new partnership and look forward to working closely with the Editorial Team, AO CMF, and the broader community. Together, we will continue to push the boundaries of research and ensure that CMTR remains a vital resource for advancing patient care and outcomes in this critical field of medicine.

Sincerely,

Peter Roth

Head of Publishing MDPI

Short Biography of Author

Peter Roth: With a career in publishing going back to 1986, Peter Roth has witnessed the development of the Open Access publishing concept since its inception. Peter, who joined MDPI in 2019, has a keen focus on ensuring that the Open Access model delivers a 'triple win': success for our customers, success for ourselves as a company, and success for the scientific community at large. He was for many years Director of the Editorial Division of Karger Publishers, a worldwide publisher of scientific and medical content based in Basel, Switzerland. Peter has extensive experience of editorial strategy, publication concept development and management, and new business development and customer relationship management on all continents, especially in Asia. Within MDPI, he has overseen the establishment of a range of new journals and books, reorganised editorial governance, and set up our first office in Japan.
