Error in Figure

In the original publication [1], there was a mistake in Figure 14b as published. The labels of the curves were swapped during the Matlab processing of our experimental results. The red/diamond curve corresponds to signal “FAR” and the blue/o curve corresponds to “Switch Only”. This has significant importance since FAR has better performance than the Switch Only, as described in the text. The corrected Figure 14b appears below. The authors apologize for any inconvenience caused and state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.

Figure 14. Output power as a function of (a) $1/R_L$, (b) $V_{nc}$.
