The Energies editorial office retracts the article entitled “Gas Hydrate-Based CO₂ Capture: A Journey from Batch to Continuous” [1].

Following publication, concerns were brought to the attention of the Editorial Office regarding a significant overlap with a PhD thesis [2] from the other author without appropriate acknowledgement or consent.

Adhering to our complaints procedure, an investigation was conducted by the Editorial Office and Editorial Board that confirmed a significant overlap of text, figures and tables between this article [1] and the PhD thesis [2] without appropriate acknowledgement or citation. As a result, the Editorial Office and Editorial Board have decided to retract this article [1] as per MDPI’s retraction policy (https://www.mdpi.com/ethics#_bookmark30) and in line with the Committee on Publication Ethics’ retraction guidelines (https://publicationethics.org/retraction-guidelines).

This retraction was approved by the Editor-in-Chief of the journal Energies. The authors agreed to this retraction.
