Supplementary Material

Questionnaire: Wildfire Social Trends in Greece

Start of Block: Introduction

Goal of survey
We’re conducting research on the importance perceptions of different wildfire effects caused from wildfires in the Greek landscapes. We’d love to hear about which wildfire effects matters the most to you and what are your general approach towards the wildfire problem of our country. This will help us make improvements to the existing tool and prioritize new features.

Your feedback is important!
This questionnaire contains 22 questions. Obtaining feedback from people like you is vital to estimate the importance of each wildfire effect. We would appreciate your taking the time to complete the following survey. It should take about 10 to 15 minutes of your time. Let your voice be heard!

Confidentiality and identity protection
Your responses are voluntary and will be confidential. Responses will not be identified by individual. All responses will be compiled together and analyzed as a group.

Contact information.
If you have any questions or concerns, please contact Paleologos Paleologou, PhD Researcher and fellow with the US Forest Service J-1 International Visitor Program at the Oregon State University, at palaiologou.p@aegean.gr.

Participation consent
By clicking agree to continue, you provide consent to use your response for the purposes of this survey. In case you disagree, click on the option "I don't want to continue".

End of Block: Introduction

Start of Block: Questions about thoughts, beliefs and knowledge regarding wildfire effects

Q1.1 In which part of Greece did you reside in the longest?
   o Region (1)
   o Prefecture (2)
   o Municipality (3)
   ▼ Central Greece (0) ... North Aegean ~ Chios ~ Inousses (387)

Q2.1 For the prefecture of Greece you selected, who do you think is responsible for most wildfire ignitions?
(only one selection is allowed)
   o A specific social group   (1)
   o Weather/natural phenomena   (2)
   o Arsonists pursuing certain interests   (3)
   o A specific occupational group   (4)
   o Arsonists due to physiologic problems   (5)
Q2.2 When multiple wildfires occur across Greece, who do you think is responsible for most ignitions? (only one selection is allowed)

- A specific social group (1)
- Weather/natural phenomena (2)
- Arsonists pursuing certain interests (3)
- A specific occupational group (4)
- Arsonists due to physiologic problems (5)
- A foreign nation (6)
- The state/ the political parties (7)
- The society and its way of living (8)
- Negligence of citizens (9)
- Other (10)

Q3.1 Based on your experience and knowledge, please rate the effect of the following negative factors on reducing the regeneration and vegetation recovery potential after a wildfire, for the prefecture of Greece where you have resided the longest. (Please respond to all options)

Q3.3 Please rank the following factors based on their effect on reducing the aesthetic quality and attractiveness of the affected area after a wildfire, for the prefecture of Greece where you have resided the longest. (Please rank all options by drag and drop each option, from higher (1-up) to lower (5-down) reduction)

___ The wildfire burned inside WUI / urban forested parks or scenic mountainous areas or popular vantage points. (1)
___ The type of forest and vegetation that were burned are considered visually and aesthetically attractive. (2)
___ The affected area is in protected lands. (3)
___ Smoke reached populated places reducing visibility and affecting air quality. (4)
___ Post-fire soil related events caused erosion, soil losses or desertification. (5)

products. (1)

Lost revenue from burnt or extinct non-wood forest products like: game, beekeeping, resin, edible flora products (e.g. mushrooms). (2)

Post-fire restoration costs of infrastructure, public property, and industries. (3)

Lost revenue from burnt or delayed harvest of agricultural production. (4)

Lost revenue from tourism and recreational activities. (5)

Lost revenue from burnt or reduced livestock production. (6)

Post-fire restoration costs of houses and private structures. (7)

Post-fire restoration costs of landscape - reforestation - flood prevention. (8)

Q2.3 Please rank your understanding and perception regarding wildfire suppression effort complexity
(Please rank all options by drag and drop each option, from most (1-up) to least (8-down) indicative)

- High number of firefighting personnel. (1)
- High number of firefighting vehicles. (2)
- High number of firefighting aircrafts. (3)
- Spotting with new fire ignitions. (4)
- International aid that assist local firefighting forces. (5)
- Area declared in a State of Emergency. (6)
- Extreme fire type (crown fires). (7)
- Evacuation of settlements. (8)

Q3.8 Rank the five wildfire effects questions from most (1) to least (7) important as to their contribution to describing the overall wildfire effects.
(Please rank all options by drag and drop each option)

- Quality of landscape and vegetation. (1)
- Environmental impacts. (2)
- Regeneration potential and vegetation recovery. (3)
- Casualties and fatalities. (4)
- Destruction and damages on infrastructure. (5)
- Economic losses. (6)
- Firefighting / wildfire suppression. (7)

Fight fire with fire whenever possible (backfires) (1)
Fire is a tool that we can effectively control to protect the forests (2)
It should be used with caution and only under strict supervision (3)
If it is applied, there should be tolerance and protection of people involved in case of an accident (4)
Some natural fires must be let burn to achieve ecological objectives (5)
All fires must remain illegal (6)
Controlled fires is an inexpensive method of firefighting and removal of unwanted fuels (7)

- 3-5 (4)
- 5-10 (5)
- More than 10 (6)
Q2.6 Which policy do you believe is most capable of reducing the wildfire-related problems?
(only one selection is allowed)
○ Hiring more firefighters (1)
○ Buying new aerial firefighting units (2)
○ Buying new firefighting vehicles (3)
○ Better patrolling/surveillance (4)
○ Forest fuel reduction efforts (5)
○ Define and map forests and properties (6)
○ Strict penalties for arsonists (7)
○ Better education and knowledge for individuals and communities (8)
○ Improvement of the collaboration among the fire management / suppression agencies. (9)
