Text Correction

There was an error in the original publication [1]. We stated that none of the questionnaires included information on how long it took to complete, which is incorrect. The following corrections have been made.

Section 3, Paragraph 5: “None of the questionnaires stated how long it takes to complete each questionnaire” has been removed;

Section 4, Paragraph 1: “None of the questionnaires stated how long it takes to complete each questionnaire, which would affect the practicality of using the questionnaires in day-to-day practice” has been removed; and

Section 4, Paragraph 6: “Although none of the questionnaires stated how long it takes to complete each questionnaire” has been removed.

The authors apologize for any inconvenience caused and state that the scientific conclusions are unaffected. The original publication has also been updated.
