The authors wish to make the following correction to this paper [1]. Due to mislabeling, replace Figure 1 with:

Figure 1. (a) Schematic illustration of the effect on cementoblasts through use of sclerostin secreted by osteocytes; (b) Proliferation analysis of cementoblasts in the presence of sclerostin; (c) Live-cell staining treated by sclerostin with different concentrations.

The change does not affect the scientific results. We apologize for the mistake.
