Missing Details in Materials and Methods

In the original publication [1], details were missing from the Methods (Section 2.2).

The 8-day-old male pupae were irradiated with 366 Gy X-ray at a dose rate of 12.7083 mGy/s, and their fitness was assessed in a Nanguo pear orchard.

The authors state that the scientific conclusions are unaffected. This correction has been approved by the Academic Editor. The original publication has also been updated.
