

Supplementary Information

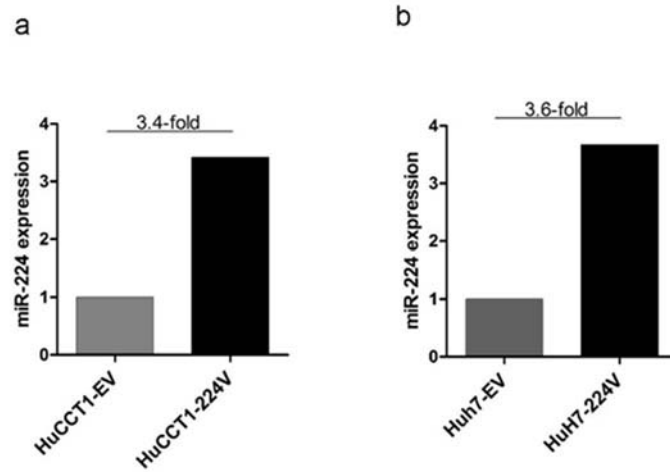

Figure S1. miR-224 is upregulated to physiological levels through retrovirus-mediated delivery. miR-224 is upregulated approximately 3.4- and 3.6-fold when retrovirus-mediated miR-224 delivery is employed in HuCCT1 (a) and Huh7 (b) cells, respectively. MIEG3 empty virus: EV, MIEG3-miR-224 virus -224V.
