**Message from the Editors-in-Chief**
Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.  

*Coatings* is a well-established, peer-reviewed, online journal dedicated to the vibrant field of surface science and engineering. *Coatings* publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

**Author Benefits**

- **Open Access** Unlimited and free access for readers
- **High Publicity and More Frequent Citations** As indicated by several studies
- **No Copyright Constraints** Retain copyright of your work and free use of your article
- **Thorough Peer Review**
- **Impact Factor: 2.881** (2020); 5-Year Impact Factor: 3.038 (2020)
- **Rapid Publication** Manuscripts are peer-reviewed and a first decision provided to authors approximately 11.4 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2021)
- **Coverage by Leading Indexing Services** SCIE-Science Citation Index Expanded (Clarivate Analytics, formerly Thomson Reuters), Scopus
- **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program
Aims and Scope

Coatings (ISSN 2079-6412) is an international, peer-reviewed and open access journal devoted to the science and engineering of coatings, thin and thick films, surfaces and interfaces. The journal covers coatings, surfaces and interfaces in the broader sense. Topics of interest include, but are not limited to:

Thin and thick films
Processes for coating deposition and modification
Characterization techniques
Functional, protective and decorative coatings
Dyes, pigments and their intermediates
Wear, corrosion, erosion
Coatings for high temperature
Film materials for packaging
Applied surface science
Adsorption, adhesion, functionalization
Fundamental and functional properties of surface and interfaces
Theoretical and computational modeling of surfaces and interfaces
High surface area systems: colloids, nanoparticles, large interfaces
