Message from the Editor-in-Chief

Biomolecules (<https://www.mdpi.com/journal/biomolecules>) is an international, peer-reviewed, open access journal focusing on biogenic substances, and published online by MDPI. *Biomolecules* is indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, and CAPlus / SciFinder. The Impact Factor (2021) is 6.064, ranking 75/296 (Q2) in 'Biochemistry and Molecular Biology'.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program (IOAP)
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the maximum length of the papers, number of figures or colors
-  **Journal Rank** JCR - Q2 (*Biochemistry & Molecular Biology*) / CiteScore - Q2 (*Biochemistry*)
-  **Coverage by Leading Indexing Services** Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases
-  **Rapid Publication** First decision provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2022)

Aims and Scope

Biomolecules publishes Articles, Reviews, Communications and Editorials that are relevant to any field of study that involves biology, chemistry, material sciences, molecular medicine, and physics. The journal has a strong focus on structures and functions of bioactive and biogenic substances, molecular mechanisms with biological and medical implications as well as biomaterials and their applications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible, there is no upper limit on the maximum length of papers. The full experimental details must be provided such that the results can be reproduced.

Main research areas include (but are not limited to):

- Molecular Structure and Dynamics
- Bioinformatics and Systems Biology
- Natural and Bio-inspired Molecules
- Synthetic Biology and Bioengineering
- Molecular Medicine
- Chemical Biology
- Cellular Biochemistry
- Biomacromolecules: Proteins
- Biomacromolecules: Lipids

- Biomacromolecules: Carbohydrates
- Biomacromolecules: Nucleic Acids
- Biological Factors
- Biological Materials
- Enzymology
- Molecular Genetics
- Molecular Biology
- Molecular Biomarkers
- Molecular Reproduction
- Molecular Biophysics
