Biomolecules (https://www.mdpi.com/journal/biomolecules) is an international, peer reviewed open access journal focusing on biogenic substances, and published online by MDPI. Biomolecules is indexed in SCIE (Web of Science), Scopus and PubMed. The Impact Factor (2020) is 4.879, ranking 96/298 (68%, Q2) in ‘Biochemistry and Molecular Biology’. The Article Processing Charges (APCs) are 2000 CHF per accepted paper.

Author Benefits

>[Open Access](http://www.mdpi.com/) Unlimited and free access for readers

>[No Copyright Constraints](http://www.mdpi.com/) Retain copyright of your work and free use of your article

>[Discounts on Article Processing Charges (APC)](http://www.mdpi.com/) If you belong to an institute that participates with the MDPI Institutional Open Access Program (IOAP)

>[No Space Constraints, No Extra Space or Color Charges](http://www.mdpi.com/) No restriction on the length of the papers, number of figures or colors

>[Journal Rank](http://www.mdpi.com/) JCR - Q2 (Biochemistry & Molecular Biology)

>[Coverage by Leading Indexing Services](http://www.mdpi.com/) Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and many other databases

>[Rapid Publication](http://www.mdpi.com/) First decision provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2021)
Aims and Scope

*Biomolecules* publishes Articles, Reviews, Communications and Editorials that are relevant to any field of study that involves biology, chemistry, material sciences, molecular medicine, and physics. The journal has a strong focus on structures and functions of bioactive and biogenic substances, molecular mechanisms with biological and medical implications as well as biomaterials and their applications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible, there is no upper limit on the length of papers. The full experimental details must be provided such that the results can be reproduced.

Main research areas include (but are not limited to):

- Molecular Structure and Dynamics
- Bioinformatics and Systems
- Molecular Medicine
- Natural and Bio-inspired Molecules
- Synthetic Biology and Bioengineering
- Chemical Biology
- Biochemistry
- Biological Factors
- Biological Materials
- Enzymology
- Molecular Pathology
- Molecular Genetics
- Molecular Biology
- Molecular Biomarkers
- Molecular Reproduction
- Molecular Biophysics
- Biomacromolecules
