# Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

---

## Editor-in-Chief

Dr. Amedeo Lonardo

---

## Associate Editors

Prof. Dr. Guowang Xu  
Dr. Fidele Tugizimana  
Dr. Horst Joachim Schirra  
Dr. Gabi Kastenmüller

---

## Aims

*Metabolites* (ISSN 2218-1989) is an international, peer-reviewed open access journal of metabolism and metabolomics. *Metabolites* publishes original research articles and review articles in aspects of metabolites and metabolism relevant to the fields of metabolomics, metabolic biochemistry, computational and systems biology, biotechnology and medicine. We strongly suggest that all submissions have a substantial focus on the measurement, analysis or biological roles of metabolites, metabolic biomarkers or metabolic pathways.

Currently, *Metabolites* is indexed by Science Citation Index Expanded (SCIE-Web of Science), PubMed, PubMed Central and Scopus.

---

## Scope

Topics of interest include, but are not limited to:

- Identification, structure elucidation and quantification of endogenous and exogenous metabolites
- Experimental and computational advances in metabolomics
- Effects of genetic and environmental perturbations on metabolite levels and fluxes
- Applications of metabolomic technologies in the clinical laboratory
- Applications of metabolomic technologies in agriculture and industry
- Progress in methods for biological sample preparation for biomarker and metabolic profiling studies
- Advances in data processing and data analysis concerned with low-molecular weight metabolites detection, identification and curation

---

## Author Benefits

### Open Access

Unlimited and free access for readers

### No Copyright Constraints

Retain copyright of your work and free use of your article

### Thorough Peer-Review

### 2023 Impact Factor: 3.5

(*Journal Citation Reports* - Clarivate, 2024)

### Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

### No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures, or use of colors

### Journal Rank

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

### Coverage by Leading Indexing Services

Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases

### Rapid Publication

A first decision is provided to authors approximately 16.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024)
