Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access Unlimited and free access for readers

No Copyright Constraints Retain copyright of your work and free use of your article

2021 Impact Factor: 4.658 (Journal Citation Reports - Clarivate, 2022)

Coverage by Leading Indexing Services Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases

Thorough Peer-Review

No Space Constraints, No Extra Space or Color Charges No restriction on the maximum length of the papers, number of figures or colors

Rapid Publication First decision provided to authors approximately 14.1 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2022)

Journal Rank JCR - Q1 (*Plant Sciences*) / CiteScore - Q2 (*Plant Science*)

Aims and Scope

The main aim of our journal is to encourage scientists and research groups to publish theoretical and experimental results of research in all fundamental and applied fields of plant science. The full experimental procedure must be provided so that the results can be reproduced and, therefore, there is no limitation on the length of articles for this journal.

Plants covers the following areas and sub-areas of interest in plant science:

- Plant cytology and histology
- Plant anatomy and morphology
- Systematics, taxonomy and classification
- Plant physiology and ecophysiology
- Plant genetics, molecular biology and biochemistry
- Ecology and biogeography of plants
- Phytocenology
- Evolutionary biology, plant phylogeny and paleobotany
- Plant diversity and conservation biology
- Experimental and applied plant science
- Plant interactions with abiotic and biotic stresses
