Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, biosimilar, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, biosimilars, and nano-biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to Biomedicines, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

- **Open Access** Unlimited and free access for readers
- **Rapid Publication** Manuscripts are peer-reviewed and a first decision provided to authors approximately 17.2 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the second half of 2021)
- **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
- **High Visibility** Covered in the Science Citation Index Expanded (SCIE - Web of Science) from Vol. 4, and in Scopus. Citations available in PubMed; full-text archived in PubMed Central
- **Journal Rank** JCR - Q1 (Biochemistry & Molecular Biology) / CiteScore - Q2 (General Biochemistry, Genetics and Molecular Biology)
Aims and Scope

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products.

The scope of *Biomedicines* includes:

- Pathogenesis and mechanisms of diseases
- Translational medical research
- Biomaterial in biomedical research
- Novel targets in various therapeutic areas: cardiovascular, vascular, hematology, oncology, neurology, orthopedics, dermatology, ophthalmology
- Biomarker discovery and early diagnosis research
- Drug discovery and drug development, biomedicine, and pharmacotherapy
- Biopharmaceutical biomedicine: biologics, and biosimilars
- Nanobiotechnological advances in biomedicine: nanomedicine, nanoscaffold implants (synthetic vascular graft), biosensors, bioimaging, gene therapy, vaccine, cell therapy, and tissue engineering.
