We invite you to read a selection of recent articles published in *Children* (ISSN 2227-9067) and to consider publishing your next paper with us. *Children* is an international, open access journal established in 2013. The journal is dedicated to the streamlined, yet scientifically rigorous, dissemination of peer-reviewed science related to childhood health and disease, in both developed and developing countries. The publication focuses on sharing clinical, epidemiological, and translational research relevant to children’s health. We are now indexed in SCIE (Web of Science) and PubMed. Please note that *Children* does not accept mini reviews since 2019.

**Aims**

*Children* (ISSN 2227-9067) is an international, open access journal dedicated to a streamlined, yet scientifically rigorous, dissemination of peer-reviewed science related to childhood health and disease in developed and developing countries.

The publication focuses on sharing clinical, epidemiological, and translational science relevant to children’s health. We strive to publish high-quality original articles and reviews that are applicable to the practice of Pediatrics in all its subspecialties. Moreover, the primary goals of the publication are to highlight under-represented pediatric disciplines, to emphasize interdisciplinary research and to disseminate advances in knowledge in global child health. In addition to original research, the journal publishes expert editorials and commentaries, clinical case reports, and insightful communications reflecting the latest developments in pediatric medicine. Submissions from related fields such as sports science, education and sociology will be considered; however, all submissions to *Children* should highlight the pediatric health implications of the results presented. By publishing meritorious articles as soon as the editorial review process is completed, rather than at predefined intervals, *Children* also permits rapid open access sharing of new information, allowing us to reach the broadest audience in the most expedient fashion. Ultimately, we seek to improve the quality of care and the health of infants, children, and adolescents, by contributing to increasing knowledge and helping to advance scientific discovery in the field of pediatrics.
Scope

Articles in *Children* include, but are not limited to:

- Pediatric Public Health and Epidemiology
- Pediatric Global Health
- General Pediatrics
- Pediatric Subspecialties
  - Neurology
  - Developmental/Behavioral Medicine
  - Neonatal/Perinatal Medicine
  - Hematology-Oncology
  - Adolescent Medicine
  - Pulmonology
  - Gastroenterology, Hepatology, and Nutrition
- Surgery
- Cardiology
- Endocrinology
- Critical Care Medicine
- Urology
- Sleep Medicine
- Allergy and Immunology
- Genetics
- Nephrology
- Infectious Diseases
- Emergency Medicine
- Rheumatology
- Psychiatry and Psychology
- Ethics
- Pediatric Hospitalist Medicine
- Health Service and Health Policy Research

Author Benefits

Open Access
Unlimited and free access for readers

No Copyright Constraints
Retain copyright of your work and free use of your article

Thorough Peer-Review

Discounts on Article Processing Charges (APC)
If you belong to an institute that participates with the MDPI Institutional Open Access Program

Journal Rank

JCR - Q2 (Pediatrics) / CiteScore - Q2
(Pediatrics, Perinatology and Child Health)
