remote sensing

an Open Access Journal by MDPI

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend Remote Sensing for your best research publications for a fast dissemination of your research.

Author Benefits

- Open Access  Unlimited and free access for readers
- No Copyright Constraints  Retain copyright of your work and free use of your article
- Thorough Peer-Review
- 2022 Impact Factor: 5.0 (Journal Citation Reports - Clarivate, 2023)
- Discounts on Article Processing Charges (APC)  If you belong to an institute that participates with the MDPI Institutional Open Access Program
- No Space Constraints, No Extra Space or Color Charges  No restriction on the maximum length of the papers, number of figures or colors
- Journal Ranked  JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
- Coverage by Leading Indexing Services  Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases
- Rapid Publication  A first decision is provided to authors approximately 21.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2023)
Aims and Scope

Remote Sensing (ISSN 2072-4292) publishes regular research papers, reviews, technical notes and communications covering all aspects of remote sensing science, from sensor design, validation/calibration, to its application in geosciences, environmental sciences, ecology and civil engineering. Our aim is to publish novel/improved methods/approaches and/or algorithms of remote sensing to benefit the community, open to everyone in need of them. There is no restriction on the maximum length of the papers or colors used. The method/approach must be presented in detail so that the results can be reproduced. Moreover, authors are encouraged to submit their original codes/data as supplementary information for the paper.

The scope of Remote Sensing includes:
- Multi-spectral and hyperspectral remote sensing
- Microwave remote sensing
- Lidar and laser scanning
- Unmanned aerial vehicles
- Satellite image processing and pattern recognition
- Data fusion and data assimilation
- Remote sensing applications

Section Editors-in-Chief

Dr. Alexander Kokhanovsky
Prof. Dr. Alfredo R. Huete
Dr. Carlos Alberto Silva
Dr. Chris Roelfsema
Prof. Dr. Clement Atzberger
Prof. Dr. Deepak R. Mishra
Prof. Dr. Fumio Yamazaki
Dr. Jorge Vazquez
Prof. Dr. Jose Moreno
Prof. Dr. Lefei Zhang
Dr. Magaly Koch
Prof. Dr. Mattia Crespi
Prof. Dr. Qi Wang
Dr. Richard Gloaguen
Prof. Dr. Soe Myint
Prof. Dr. Stuart Phinn
