# Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

## Aims

*Photonics* (ISSN 2304-6732) aims at a fast turn around time for peer-reviewing manuscripts and producing accepted articles. The online-only and open access nature of the journal will allow for a speedy and wide circulation of your research as well as review articles. We aim at establishing *Photonics* as a leading venue for publishing high impact fundamental research but also applications of optics and photonics. The journal particularly welcomes both theoretical (simulation) and experimental research. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. The full experimental details must be provided so that the results can be reproduced. Electronic files and software regarding the full details of the calculation and experimental procedure, if unable to be published in a normal way, can be deposited as supplementary material.

---

## Scope

- Biophotonics, biomedical optics, and medical optics
- Semiconductor photonics and optoelectronics
- Nanotechnology and nanostructures in optics
- Quantum optics, quantum computing, and applications
- Photonic materials and technology
- Metamaterials, plasmonics, and nanophotonics
- Integrated optoelectronics and Integrated optics
- Photonics device and technologies
- Optical communications and systems
- Nonlinear and ultrafast optics
- Imaging systems and holography
- Computational photonics and nanostructures
- Photonics for energy and green technologies
- Fundamental & applications of photonics/optics
- Photon-electron-phonon interaction in nanostructures
- Physics and simulation: material properties, device technologies, and integrated systems

---

## Author Benefits

### Open Access

Unlimited and free access for readers

### No Copyright Constraints

Retain copyright of your work and free use of your article

### Thorough Peer-Review

### 2023 Impact Factor: 2.1

(*Journal Citation Reports* - Clarivate, 2024)

### Journal Rank

JCR - Q2 (Optics)

### Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

### No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

### Journal Rank

JCR - Q2 (Optics)

### Coverage by Leading Indexing Services

Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases

### Rapid Publication

A first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024)
