Message from Journal Section Editor-in-Chiefs

Researchers are most welcome to contribute original research articles or comprehensive review papers for consideration and publication in *Journal of Risk and Financial Management (JRFM)*, an international peer-reviewed open access journal. *JRFM* adheres to rigorous peer-review as well as editorial processes, and publishes leading research on economics, finance and risk management. The goal of *JRFM* is to enable rapid dissemination of high impact research to the scientific community.

Author Benefits

- **Open Access**  Unlimited and free access for readers
- **No Copyright Constraints**  Retain copyright of your work and free use of your article
- **Thorough Peer-Review**
- **Discounts on Article Processing Charges (APC)**  If you belong to an institute that participates with the MDPI Institutional Open Access Program
- **Coverage by Leading Indexing Services**  ESCI (Web of Science), EconBiz, EconLit, RePEc, and many other databases
- **Rapid publication**  First decision provided to authors approximately 18.7 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2021)
Aims and Scope

*JRFM* (ISSN 1911-8074) is an international, peer-reviewed, open access journal devoted to the rapid publication of original and innovative papers, theoretical analysis, comprehensive review articles, short notes, and communications related to all fields associated with risk and financial management. Technical areas associated with analysing and managing large portfolios of financial assets, with alternative time-varying (or dynamic) risk models, such as conditional, stochastic and realized volatility, volatility and co-volatility spillovers, and causality in higher moments, such as variance, skewness and kurtosis, are strongly encouraged for submission. Mathematical, statistical, econometric, and computational issues are paramount as they are intrinsically associated with the theoretical, practical and empirical issues in analysing real life financial data.

Researchers are encouraged to publish the results of their theoretical and empirical analysis in as much detail as possible. The journal intends to publish high impact theoretical and empirical outcomes in a short turnaround time.
