Condensed Matter is an online open-access journal providing an advanced forum for the development of all aspects of the physics of condensed matter systems. We are looking to build a collection of high-quality research articles, supported by a community from across the field of condensed matter physics. In this task, I will be assisted by a highly qualified Editorial Board. We accept papers on basic research as well as applications, and experimental or theoretical work. Currently the journal is indexed by ESCI—Web of Science and Scopus. We hope you will consider Condensed Matter as an exceptional home for your manuscript.

Author Benefits

- **Open Access** Unlimited and free access for readers
- **Thorough Peer-Review**
- **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
- **Coverage by Leading Indexing Services** Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and many other databases.
- **Rapid Publication** First decision provided to authors approximately 16.3 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2021).
Aims and Scope

An open access journal covering all aspects of the physics of condensed matter systems, including the following topics:

- Solid state physics
- Magnetism
- Structure of matter and phase transitions
- Properties of composites and alloys
- Electronic properties of materials
- Superconductivity
- Spintronics
- Quantum phenomena in complex condensed matter
- Soft condensed matter, active matter
- Computational methods applied to condensed matter
- Materials for energy and electronics in the quantum era
