Message from the Editor-in-Chief

Urban Science is a scholarly international journal which provides a platform for the exchange of theories, ideas, methods, analyses, and comparative studies of urban and regional development. It is a peer-reviewed, open access journal that publishes high quality original articles, theoretical essays, critical reviews, research notes, and shorter communications. Its broad definition of “science” includes both quantitative and qualitative methods of social, environmental, and spatial analysis. There is no restriction on the length of the papers.

- No Space Constraints, No Extra Space or Color Charges No restriction on the length of the papers, number of figures or colors
- Coverage by Leading Indexing Services ESCI (Web of Science) and many other databases
- Rapid Publication First decision provided to authors approximately 22.3 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the second half of 2021)
Aims and Scope

*Urban Science* (ISSN 2413-8851) is an international, scientific, peer-reviewed, open access journal of urban and regional studies. Urban Science provides an advanced forum for the exchange of ideas, methods, and information concerning urban and regional studies. It publishes high-quality original articles, reviews, research notes, and short communications, etc.

The primary aim of this journal is to encourage scientists to publish their theoretical and empirical research relating to urban and rural development, the environment and its resources, the economy, policy, and communities. Therefore, the journal has no restrictions on the length of manuscripts, provided that the text is concise and comprehensive. Full experimental details must be provided in order for the results to be reproduced.

- Urban environmental and resource controversies;
- Landscape and urban planning;
- Meteorology, climate change and urban disaster;
- Urban health and welfare;
- Digitalization and smart cities;
