Message from the Editor-in-Chief

As the only MDPI open access journal dedicated to tropical medicine and infectious disease, and building on 16 years of publication of its predecessor, *Annals of the Australasian College of Tropical Medicine* (ACTM), the papers published in *Tropical Medicine and Infectious Disease* span from those sciences related to tropical medicine and infectious disease, to clinical tropical medicine, as well as epidemiological and social science studies and the fields related to disease control and global public health. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging tropical medicine and infectious diseases, as well as timely reviews and topical commentary on cutting-edge aspects of all these areas. Papers in allied fields, such as travel medicine and expedition and wilderness medicine, are also welcome.

Author Benefits

- **Open Access** Unlimited and free access for readers
- **No Copyright Constraints** Retain copyright of your work and free use of your article
- **Thorough Peer-Review**
- **2021 Impact Factor: 3.711 (Journal Citation Reports - Clarivate, 2022)**
- **No Space Constraints, No Extra Space or Color Charges** No restriction on the maximum length of the papers, number of figures or colors
- **Coverage by Leading Indexing Services** Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Informit, and other databases
- **Rapid Publication** First decision provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the second half of 2022)
Aims and Scope

We aim to publish papers on all tropical diseases of global significance, as well as neglected tropical diseases as defined from time-to-time by the World Health Organization. The scope of *Tropical Medicine and Infectious Disease* includes, but is not limited to:

- Clinical tropical medicine
- Tropical public health
- Tropical infectious diseases
- Parasitology and entomology
- Bacteriology, mycology and virology
- Epidemiological and social science studies
- Chemotherapy and pharmacology
- Immunology
- Disease prevention, control and elimination
- Emerging and re-emerging infectious diseases
- Emerging public health threats
- Global health and One Health
