Catalysts impact the world through the production of fuels to power our economies, by the synthesis of materials that improve our lives, and by the destruction of harmful pollutants. Cutting-edge research in catalysis pushes forward our understanding of how catalysts work, ultimately leading to better catalytic processes and greater impacts on society. *Catalysts* offers you the opportunity to publish your research in an open access format, providing scholars with quick access to your research. Please consider publishing in *Catalysts* when preparing your next paper.

Aims and Scope

Catalysts (ISSN 2073-4344) is an international open access journal of catalysts and catalyzed reactions. Catalysts publishes reviews, regular research papers (articles) and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible, therefore, there is no restriction on the length of the papers. The full experimental details must be provided so that the results can be reproduced.
