Message from the Editorial Board

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

- **Open Access** Unlimited and free access for readers
- **No Copyright Constraints** Retain copyright of your work and free use of your article
- **Thorough Peer-Review**
- **2020 Impact Factor: 3.576** *(Journal Citation Reports - Clarivate, 2021)*
- **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program
- **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
- **Coverage by Leading Indexing Services** Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, Ei Compendex, Inspec, and many other databases
Aims and Scope

Sensors (ISSN 1424-8220) is an open access journal that provides an advanced forum for studies of sensors. Our goal is to publish high-impact articles of broad interest to the sensor community and to serve as a forum for major developments in sensor research. The journal publishes reviews, regular research papers, communications, conference reports, short notes and commentaries. It also features highlights from sensor’s literature in a ‘News and Views’ section. There is no restriction on the length of published articles or on the use of color illustrations. All submitted manuscripts undergo rigorous peer review prior to publication.

The scope of Sensors includes:

- Physical sensors
- Chemical sensors
- Biosensors
- Remote sensors
- Sensor networks
- Smart/Intelligent sensors
- Sensor devices
- Sensor technology and application
- Sensing principles
- Optoelectronic and photonic sensors
- Sensor arrays and Chemometrics
- Micro and nanosensors
- Internet of Things
- Industrial Sensors
- Signal processing, data fusion and deep learning in sensor systems
- Sensor interface
- Advanced materials for sensing
- Sensing systems
- Localization and object tracking
- Sensing and imaging
- Action recognition
- Communications and signal processing
- Environmental Sensing
- Sensors and Robotics
- Smart Agriculture
