Message from the Editor-in-Chief

Genes are central to our understanding of biology, and modern advances such as genomics and genome editing have maintained genetics as a vibrant, diverse and fast-moving field. There is a need for good quality, open access journals in this area, and the Genes team aims to provide expert manuscript handling, serious peer review, and rapid publication across the whole discipline of genetics. Starting in 2010, the journal is now well established and recognised. Why not consider Genes for your next genetics paper?

Author Benefits

- **Open Access** Unlimited and free access for readers
- **No Copyright Constraints** Retain copyright of your work and free use of your article
- **2021 Impact Factor: 4.141** *(Journal Citation Reports - Clarivate, 2022)*
- **High Visibility** Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, and other databases
- **Rapid Publication** Manuscripts are peer-reviewed and a first decision provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2022)
- **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program
- **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
- **Journal Rank** JCR - Q2 *(Genetics & Heredity)* / CiteScore - Q2 *(Genetics)*
**Aims and Scope**

*Genes* (ISSN 2073-4425) is an international, peer-reviewed, open access journal which provides an advanced forum for studies on all aspects of genetics and genomics from the molecular to the population level. Papers published in *Genes* are relevant to a broad audience and cover basic, translational, clinical and industrial aspects of genetics and genomics. *Genes* publishes reviews, research articles, communications and technical notes.

Topics covered in *Genes* include but are not limited to:

- Molecular Genetics
- Microbial Genetics and Genomics
- Human Genetics and Genomics
- Plant Genetics and Genomics
- Animal Genetics and Genomics
- Technologies and Resources for Genetics (including Tools, Software and Databases)
- Population and Evolutionary Genetics and Genomics
- Clinical Genomics in Genetic Diseases and Cancer
