Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. Cells encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Editors-in-Chief
Prof. Dr. Cord Brakebusch
Prof. Dr. Alexander E. Kalyuzhny

Associate Editor
Dr. Bor Luen Tang

Section Editors-in-Chief
Prof. Dr. Ludger Hengst
Dr. Christian Neri

Aims
Cells (ISSN 2073-4409) is an international, peer-reviewed, open access journal which provides an advanced forum for studies related to cell biology, molecular biology and biophysics. It publishes reviews, research articles, communications and technical notes. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers. Full experimental and/or methodical details must be provided. There are, in addition, unique features of this journal:

- manuscripts regarding research proposals and research ideas will be particularly welcomed
- electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way - can be deposited as supplementary material
- we also accept manuscripts communicating to a broader audience with regard to research projects financed with public funds
Scope

*Cells* covers every topic related to cell biology and physiology, molecular biology, and biophysics. Thus, our major focus is on experimental cytology rather than on clinical and epidemiological studies.

Topics of interest include but are not limited to:

- Cell Structure
- Cell Physiology
- Cellular Metabolism
- Cellular Immunology
- Intra- and Extracellular Signaling
- Cell Movement and Motility
- Autophagy
- Apoptosis
- Cell Aging, Senescence
- Cell Techniques
- Cell Growth and Differentiation
- Stem Cells
- Genetic Disorders and Therapy
- Omics
- Plant, Algae and Fungi Cell Biology
- Neurodegeneration, Neuroinflammation

Author Benefits

**Open Access**
Unlimited and free access for readers

**No Copyright Constraints**
Retain copyright of your work and free use of your article

**Thorough Peer-Review**

2022 Impact Factor: 6.0
*(Journal Citation Reports - Clarivate, 2023)*

**Discounts on Article Processing Charges (APC)**
If you belong to an institute that participates with the MDPI Institutional Open Access Program (IOAP)

**No Space Constraints, No Extra Space or Color Charges**
No restriction on the maximum length of the papers, number of figures or colors

**Coverage by Leading Indexing Services**
Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and many other databases

**Rapid Publication**
A first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2023)
Affiliated Societies:
Nordic Autophagy Society (NAS)
Society for Regenerative Medicine (Russian Federation) (RPO)
Spanish Society for Biochemistry and Molecular Biology (SEBBM)
Spanish Society of Hematology and Hemotherapy (SEHH)
