Message from the Editors-in-Chief

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. Cells encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

- **Open Access** Unlimited and free access for readers
- **No Copyright Constraints** Retain copyright of your work and free use of your article
- **Thorough Peer-Review**
- **2022 Impact Factor: 6.0 (Journal Citation Reports - Clarivate, 2023)**
- **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program
- **No Space Constraints, No Extra Space or Color Charges** No restriction on the maximum length of the papers, number of figures or colors
- **Coverage by Leading Indexing Services** Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and many other databases
- **Rapid Publication** A first decision is provided to authors approximately 18.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2023)
Aims and Scope

*Cells* (ISSN 2073-4409) is an international, peer-reviewed open access journal that provides an advanced forum for studies related to cell biology and physiology, molecular biology, and biophysics. We aim to encourage scientists to publish their experimental and theoretical results in as much detail as possible.

The scope of *Cells* includes:

- Cell Structure
- Cell Physiology
- Cellular Metabolism
- Cellular Immunology
- Intra- and Extracellular Signaling
- Cell Movement and Motility
- Autophagy
- Apoptosis
- Cell Aging, Senescence
- Cell Techniques
- Cell Growth and Differentiation
- Stem Cells
- Genetic Disorders and Therapy
- Omics
- Plant, Algae and Fungi Cell Biology
- Neurodegeneration, Neuroinflammation
