reactions

An Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Dmitry Yu. Murzin

Message from the Editor-in-Chief

Reactions (ISSN 2624-781X) is a peer-reviewed and open access journal which provides a unifying research framework for a broad range of fundamental and applied aspects of chemical reactions. Various topics, including development of new reactions and methodologies, reaction mechanism and kinetics, complex reactions, reaction engineering, catalysis, and reactor technology, among others, are of interest.

All articles undergo a rigorous peer-review process. We would like to invite you to contribute to the journal by sending your high quality research papers. The editorial focus is on scientifically proven work within the scope of the journal rather than considerations of its future impact.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Thorough Peer-Review**
-  **Rapid Publication** Accepted papers are immediately published online
-  **Free Publication** Article Processing Charges (APC) are currently waived
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors

Aims and Scope

Reactions is a peer-reviewed, open access journal which provides an advanced forum for experimental, theoretical, computational and modelling studies of reaction chemistry and engineering.

The topics include, but are not limited to the following:

- Reaction Mechanism and Kinetics
- Reaction Screening and Optimization
- Complex Reactions
- Reaction Network Analysis
- One-pot, Tandem, Domino Reactions
- Catalysis
- Reaction Monitoring
- Development of New Reactions and Methodologies
- Chemical Reaction Engineering
- Bioreaction Engineering
- Catalytic Reaction Engineering
- Electrochemical and Photochemical Reaction Engineering
- Environmental Reaction Engineering
- Polymerization Reaction Engineering
- Reactor Engineering
- Emerging Reactor Technologies
- Modeling, Design, Control, and Optimization of Chemical Reactors
- Micro-Reactors and Micro Reaction Engineering
- Multiphase Systems and Reacting Flows
