Message from the Editor-in-Chief

The global impact of parasites on human and animal health is immense. While, in many parts of our world, advances in parasitology have led to successful elimination of major health issues this is not the case for other areas. There is a need for a levelling up of these significant human impacts across our planet. The role of parasitic diseases in animal and plant health remain much more obscure and leave us with many unanswered challenges. Research into parasitology draws together broad aspects from host-parasite interactions, through environmental and ecosystem cycles to an intrinsically interesting group of organisms shaped by evolutionary adaptations. *Parasitologia* is a developing journal that seeks to serve the international community by publishing high quality studies that further a holistic understanding of this important science and have a meaningful impact on health across our planet.

Editor-in-Chief

Prof. Dr. Geoff Hide

Aims

Parasitologia (ISSN 2673-6772) is an international, peer-reviewed open access journal of parasitology published quarterly by MDPI. It publishes research papers, reviews and communications related to parasite biology, with particular attention to the effects and physiological alterations to their hosts and vectors, and to the strategies implemented by parasites to transmit between hosts and counteract their immune defences.

Scope

- Parasite biology;
- Parasitic diseases, diagnosis and treatment;
- Parasite surveillance, epidemiology and public health;
- Host-parasite relationships;
- Identification and characterization of parasites;
- Molecular epidemiology;
- Parasite recognition and host immune defences;
- Genetics and molecular biology of parasites;
- Parasites of plants, invertebrates and vertebrates;
- Comparative parasitology and evolution;
- Control of insect pests;
- Control of vectors;
- Ecology of parasite transmission cycles;
- Role of climate change and other global factors in parasite epidemiology.

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

Journal Rank

CiteScore - Q2 (Veterinary (miscellaneous))

Rapid Publication

A first decision is provided to authors approximately 19.2 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the second half of 2024)
