Message from the Editor-in-Chief

Textiles (ISSN 2673-7248) is an open access peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, opinions, and short communications on all perspectives of textile including science, engineering, design, and business. It concerns research and innovation in the field of textile materials. This field is very broad and covers many topics. Textile materials composed of fibers linked by weaving, braiding, knitting, or sewing constitute a wide range of materials and are essential for many applications. They both are ancestral materials used since antiquity and are used for advanced applications, such as composites in aeronautics or the medical industry.

On behalf of the entire Editorial Board, I invite you to submit your exciting research to Textiles, and I look forward to contributions from all textile-related fields. I wish a great success of Textiles.

Author Benefits

- **Open Access** Unlimited and free access for readers
- **No Copyright Constraints** Retain copyright of your work and free use of your article
- **Thorough Peer-Review**
- **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program (IOAP)
- **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
- **Rapid Publication** First decision provided to authors approximately 20.7 days after submission; acceptance to publication is undertaken in 5.1 days (median values for papers published in this journal in the second half of 2022)
Aims and Scope

Textiles is a multidisciplinary textile journal that encourages scientists to publish their experimental, theoretical, survey-based statistical, simulated results with necessary details. Therefore, there is no restriction on the length of papers. The full experimental and computational details must be provided so that results can be reproduced.

Application of textiles is not only limited to clothing but is possible also in many other industrial applications that involve continuous research endeavors around the globe to advance and ease human life. The scope of the journal is very wide, including all aspects of textiles, such as:

- Textile materials such as fiber, yarn, fabric, and apparel;
- Textile manufacturing related to fiber, yarn, fabric (weaving, knitting, nonwoven, braiding, crocheting), and apparel;
- Textile and clothing science, engineering, and chemistry;
- Textile processing such as pretreatment, dyeing, printing, finishing;
- Technical textiles, clothing comfort, and protective textiles;
- Smart textiles;
- Textile testing and quality control;
- Textile- and fiber-based composites;
- Textile technology and management;
- Textile merchandising and consumer behavior;
- Fashion and apparel design;
- Textile history and archeology.
