Message from the Editor-in-Chief

The contemporary world is struggling with the aging of the population, which necessitates the design of a diet for “healthy aging”. In this context, nutraceuticals, health-supportive substances, are still significant, remaining in the focus of scientific interests and being continuously developed worldwide. *Nutraceuticals* focuses on research and development of all fields on nutraceuticals. All types of articles, i.e., reviews, original papers, and short communications, are kindly welcome.
