The contemporary world is struggling with the aging of the population, which necessitates the design of a diet for “healthy aging”. In this context, nutraceuticals, health-supportive substances, are still significant, remaining in the focus of scientific interests and being continuously developed worldwide. *Nutraceuticals* focuses on research and development of all fields on nutraceuticals. All types of articles, i.e., reviews, original papers, and short communications, are kindly welcome.
Aims and Scope

*Nutraceuticals* (ISSN 1661-3821) is an international, peer-reviewed, open-access journal on the discovery, development, and production of nutraceuticals. It publishes reviews, original research papers, communications, case reports, and short notes. Our aim is to encourage scientists to publish their theoretical and experimental results in as much detail as possible. There is no restriction on the maximum length of the papers. Full experimental and/or methodical details must be provided.

- Traditional or Natural Nutraceuticals (e.g., Nutrients, Herbals, Phytochemicals, Probiotic Microorganisms, Nutraceutical Enzymes)
- Non-traditional or Artificial Nutraceuticals (e.g., Fortified and Recombinant Nutraceuticals)
- Medical Foods / Foods for Special Medical Purposes
- Nutritional Supplements
- Dietary Supplements
- Functional Foods
- Veterinary Nutraceuticals
- Research and Development of Nutraceuticals
- Efficiency and Safety of Nutraceuticals
- Clinical Studies of Nutraceuticals and Biomarkers
- Production Technologies of Nutraceuticals
- Mechanisms of Action and Therapeutic Potential of Nutraceuticals
- Applications of Nutraceuticals Trends and Perspectives
